

Schedule for Playwright using JavaScript and TypeScript – QA Mitra

JavaScript OR TypeScript

Day - 0: JavaScript/TypeScript installation

Day – 1:

- What is Testing?
- What is Manual Testing?
- What is Automation Testing?

Day - 2: Variables in JS/TS

Day - 3: Data Types in JS/TS

Day - 4: Operators in JS/TS

Day - 5: Statements in JS/TS

Day - 6: Loops in JS/TS

Day - 7: Loops Continuation

Day – 8: Functions in JS/TS

Day - 9: Function Continuation

Day - 10: Arrays in JS/TS

Day - 11: Array Continuation

Day - 12: Strings in JS/TS

Playwright

Day - 13:

- Introduction to Playwright and its features
- Install Node.js and Visual Studio Code for setting up Playwright Environment

Day - 14:

- Create NPM project and Install Playwright dependencies
- Playwright configuration file understanding
- Understanding Playwright architecture

Day - 15:

- Importance of Playwright Test Annotations and async await concept
- Cover Key concepts like browser and page fixture
- First playwright test run in multiple browser

Day - 16:

- Locators supported by playwright

Day -17:

- Playwright Special getBy Locators

Day -18:

- Different methods available in Playwright
- Learning clicking on an element, typing, getting text from an element

Day -19:

- Synchronization/Auto waiting concept
- Handling Checkbox and radio button
- Getting text from an element

Day -20:

- Getting text from multiple element
- Understanding Headless/Headed mode

Day -21:

- Handling mouse operations like (click, double click, right click, mouse hover and drag and drop)
- Handling Alert/Pop-up

Day -22:

- Handling drop down developed using <select> tag
- Handling drop down developed using non select tag

Day -23:

- Child windows Handling

- Assertions

Day -24:

- E2E automation script in Playwright

Day -25:

- E2E automation script in Playwright
- Handling Table automation

Day -26:

- Playwright Inspectors (Test Runner & Debugger), Trace Viewer (Logs), Codegen (Record and Playback) demo and examples

Day -27:

- Hidden element validation
- Frames handling
- Handling Single and Multiple file uploads using Playwright

Day -28:

- Shadow DOM handling
- Calendar Selection

Day -29:

- Handling file Download
- Keyword Operations

Day -30:

- Playwright request method
- Response Validation
- Parsing API responses

Day -31:

- Storing the authentication details to Local Storage
- Script for Web and API as mix

Day -32:

- Screenshot for page and specific element
- Visual testing using playwright
- Handling Scroll

Day -33-34:

- Understanding POM framework

- Setup Page Object Model framework
- Project configuration for framework

Day -35-37:

- Handling the data from JSON, Excel and .env file
- Parametrization in running test with different data
- Test Retries, Serial and Parallel execution
- Test Control and handling multiple environments.

Day -38-39:

- HTML and Allure, Monocart report generation for Playwright automation
- Understanding GitHub, GitHub Actions

Day -40:

- Install & Configure CI/CD using Jenkins
- Integrate the playwright framework with Jenkins

Day -41-42:

- Understanding Playwright MCP
- Use of Playwright MCP to generate POM framework automatically
- Use of different LLM Models

Day -43:

Course Completion

Bonus – Recorded Sessions

- Introduction to cucumber framework
- Cucumber configuration and setup feature files
- Steps definition and page script generation
- Cucumber Hooks, Tags, Parametrization
- HTML report for cucumber framework
